

PROTECT YOURSELF FROM ANIMALS

STOP

THINK

DO

Inexperienced people should be supervised until they can handle livestock safely.

To protect ourselves from animals we:

- Plan the job including an escape plan.
- Keep your eyes open. Don't turn your back on the animals.
- Work with animals in a quiet, confident manner.
- Keep a 5-metre distance unless working directly with the animal.
- Wear the right safety gear and have safe equipment
- Destroy dangerous animals.
- Keep animal facilities tidy and well maintained.
- Work from the outside of animal facilities where we can.
- Exit calmly and quickly if there are signs of aggression.
- Keep out of the 'kick' zone.
